

We are specialized in economical solutions
for food industry.

We provide you out of one hand with:

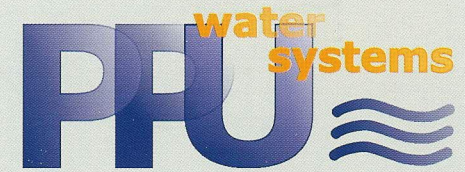

- assessment of demand
- choice of ideal process technology
- biological and chemical tests
- delivery, installation and commissioning
- documentation
- service, optimizing
- and by request the approval planning

With a net of partners we build plants all over
Europe since 15 years.

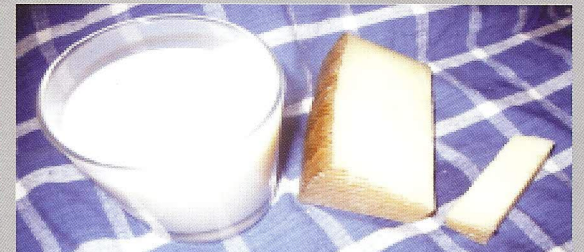

Focus is always the most economical solution.

By request we organize reference visits.

waste water treatment for food industry

dairy milk
meat processing
wineries
vegetable
fish industrie
breweries

pump station

01

oxidation systems

08

screening of solids

02

clarifying,
sedimentation

09

equilizing and mixing
energy safing

03

biological treatment
fixed bed systems

10

emulsions division
fat/grease removal
flotation systems

04

dewatering
solids

11

pH-equilizing
nutrients dosing

05

filtration
adsorbtion
osmotic systems

12

biological treatment
SBR-Systems

06

sludge dewatering
conditioning

13

sludge treatment
dewatering
fouling, stalbalizing

07

control technology
measurements

14

The waste water effluent of food industry can be polluted very high.
This is caused by losses of product or cleaning stuff.
Often have to be paid high charges.

As an alternative the effluent can be treated.
Costs can be safed and the environmental can be protected.
Depending on the individual requirements the following steps in
process technology can be possible. We can provide you with standard
solutions.
